

Extra Credit #2

Due date:

September 4, 2015

DESCRIPTION

Create a one-page resume using whatever you want (Microsoft Word works fine). The idea is to fill out everything you know about you now, and as you continue through college, replace your high school accomplishments and work experience with your newly acquired college ones! This will give you a good start and direction as to the kinds of things that are on professional resumes.

DELIVERABLES

Give me a printed version of your resume.

ADDITIONAL INFORMATION

Start from here:

http://people.clemson.edu/~rgrove/PDFdocuments/my_resume.pdf

Try to make something similar (remove anything that doesn't make sense for you, and get it down to one-page). My resume was reviewed by people from NASA and helped me get an internship, as well as a fairly nice job, so it should be a good starting point for you.
